PREDICTION OF THE FUTURE

In the present we waste a lot of the natural resources that are not regenerable.

The only one solution that we have is to take care of the planet and the natural resources right now.

To prevent the ending of the natural resources is necessary that everybody start taking measures like be careful with the excessive use of the water, excessive use of paper, pollution, etc.

Another thing that maybe is going to happen in the future is that the technology is going to increment and the human contact is going to be loosed so we have to be shure of use the technology in a proper way.

Technology

Lives would be very complicated as this helps us to transport us or investigate. communicate easily and in the future will be faster and less complicated than in the present

communicate easily or transport us if sigie haci the technological advances in the future you can reach there voladore car, transparent computers, toys etc type houses. the technological se. became another of our services and is one of the most important and that more deals and more serious andvansed And everything could get done and portable touch and easy fill technology and all the people would occupy his incredible speed and would be portable.

Nature

Siberian tiger share 95.6% of their genome with the domestic cat, which differed about 10.8 million years ago, according to a pioneering study on feline published in the journal *Nature Communications*.
